

MF920V
Quick Start Guide

Getting to Know Your Device

Appearance

The following figure is for your reference only.

1. *External antenna connectors (not all the devices support)
2. Charging/micro-USB jack
3. Indicator light
4. Power key
 - Press and hold for about 3 seconds to power on/off your device.
 - Press and hold for about 10 seconds to restart your device.
5. WPS key
 - Press and hold for 3 seconds to activate the WPS function.
6. micro-SIM card slot and reset hole

Getting to Know Your Device

Indicator lights

Indicator	Status	Description
Battery 	Red solid / blinking	The battery is low. Please charge the battery.
	Green blinking	The battery is being charged.
	Green solid	The battery level is middle or high.
	Light off	Your device is not being charged.
Wi-Fi 	Blue solid	Wi-Fi is active.
	Blue blinking	WPS is active.
	Light off	Wi-Fi is off.
SMS 	Blue solid	You have unread messages.
	Blue blinking	You have new messages.
	Light off	There is no unread message or new message.

Getting to Know Your Device

Indicator	Status	Description
Network 	Red	Error status. Not registered to the mobile network, no micro-SIM card inserted or no network service available.
	Green solid	Registered to the 2G/3G mobile network.
	Green blinking	Connected to the 2G/3G mobile network and data is being transferred.
	Blue solid	Registered to the 4G LTE network.
	Blue blinking	Connected to the 4G LTE network and data is being transferred.

Getting to Know Your Device

Connection Scenarios

The device allows multiple clients to surf on the Internet at the same time. The following figure is for your reference only.

4G Mode: A micro-SIM card can be used to access the Internet.

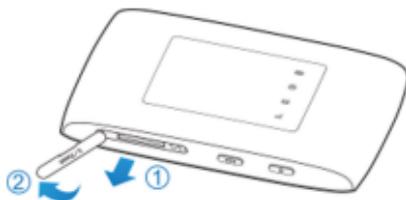

Installing Your Device

1. Open the micro-SIM card cover.

 **NOTE:**

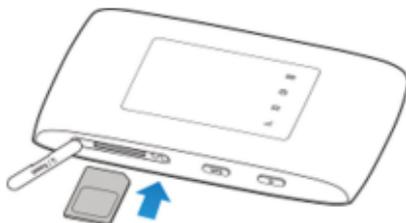

Do not remove the cover roughly, because it is connected with the device.

2. Install a micro-SIM card to the micro-SIM card slot.

 **WARNING!**

Your device does not support SIM cards, nano-SIM cards or any other non-standard micro-SIM cards. To avoid damage to the device, do not use those cards or any card holders.

3. Close the micro-SIM card cover.

Connecting to Your Device

Using Wi-Fi

1. Power on your device.
2. Ensure that your computer or other client devices have enabled Wi-Fi, and search for available wireless networks.

 **NOTE:**

Refer to your Wi-Fi-enabled client device manual for further details on how to search for wireless networks. If you use a computer, you need to set your computer to obtain an IP address automatically.

3. Select the Wi-Fi name (SSID) of your device, and click **Connect**.
4. Enter the Wi-Fi password if necessary, and click **OK**.

 **NOTE:**

Refer to the chapter **Getting to Know the Wi-Fi SSID and Password** to get the default Wi-Fi SSID and password.

5. Wait until the client device is connected to your device successfully.

Connecting to Your Device

Using a USB Cable

1. Connect a computer to your device with a USB cable.
2. Power on your device. The operating system detects and identifies new hardware, and automatically installs the software.

 **NOTE:**

If the system does not automatically launch installation, you can double-click the device installation icon in **My Computer** to install the software.

3. Wait until the computer is connected to your device successfully.

Getting to Know the Wi-Fi SSID and Password

You can view the label on the device to get the default Wi-Fi SSID and password.

Logging in to the 4G Mobile Hotspot Configuration Page

1. Ensure that the connection between your device and the client device is correct.
2. Launch the Internet browser and enter **http://192.168.0.1** in the address bar.
3. Enter the password to log in to the 4G Mobile Hotspot configuration page.

NOTE:

The default password is **admin**.

Changing the Wi-Fi SSID or Password

1. Log in to the 4G Mobile Hotspot configuration page.
2. Select Wi-Fi **Settings**.
3. Change the **Network Name (SSID)** or the **Password** in the Main SSID area.
4. Click **Apply**.

Accessing the Internet

After a client device is successfully connected to your device, you can access the Internet in **Automatic** or **Manual** mode. The default mode is **Automatic**.

Mode	Operation
Automatic	Your device is automatically connected to the Internet, and you can surf on the Internet through the client.
Manual	<ol style="list-style-type: none">1. Log in to the 4G Mobile Hotspot configuration page.2. In My router section, select LTE (or other network type) Settings > Connection Mode > Manual, and then click Apply.3. Click  to return to the home page, and then click  or .

NOTE:

- To change current connection setting, please disconnect from network.
- To modify the parameters of your device, log in to the 4G Mobile Hotspot configuration page.

Configuring Your PC

The following procedure describes how to configure the Internet Protocol in Windows 7 for your Wi-Fi connection.

1. Right-click **Network** and select **Properties**.
2. Select **Change adapter settings**.
3. Right-click **Wireless Network Connection** and select **Properties**.
4. Select **Internet Protocol Version 4 (TCP/IPv4)**, and click **Properties**.
5. Select **Obtain an IP address automatically** and **Obtain DNS server address automatically**, and click **OK**.

Warning and Notice

To the Users

- If inadequately shielded, some electronic devices, for example, the electronic system of vehicles, may be affected by the electromagnetic interference caused by the device. Consult the manufacturers of such devices before using the device if necessary.
- Operating the device may interfere with medical instruments such as hearing aids and pacemakers. Always keep the device more than 20 centimeters away from such medical instruments when your device is powered on. Power off the device if necessary. Consult a physician or the manufacturers of medical instruments before using the device if necessary.
- Be aware of the usage limitation when using the device at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed. Power off the device if necessary.
- Do not use electronic transmission devices in aircrafts, at petrol stations or in hospitals. Observe and obey all warning signs, and power off the device in these conditions.

Warning and Notice

- Do not touch the inner antenna area unless necessary. Otherwise the performance of the device may be affected.
- Do not use the device in an enclosed environment or where heat dissipation is poor. Prolonged work in such space may cause excessive heat and raise ambient temperature, which may lead to automatic shutdown of the device for your safety. In the case of such event, cool the device in a well-ventilated place before turning on for normal use.
- Keep the device out of the reach of small children. The device may cause an injury if used as a toy.
- When the device is operating, do not touch the metallic parts. Failing to do so may cause burns.
- Use original accessories or accessories that are authorized. Using any unauthorized accessories may affect the performance of the device and violate the related national regulations about telecom terminals.
- Avoid using the device near or inside metallic constructions or establishments that can emit electromagnetic waves, because signal reception may be affected.

Warning and Notice

- The device is not waterproof. Keep the device dry and store it in a shady and cool place.
- Do not use the device immediately after a sudden temperature change, because dew may be generated inside and outside the device. Do not use it until it becomes dry.
- Handle the device carefully. Do not drop, bend or strike it. Otherwise the device may be damaged.
- Only qualified personnel can dismantle and repair the device.
- An operating temperature between -10°C and $+60^{\circ}\text{C}$ and humidity between 5% and 95% are recommended.

Using Battery

Do not change the built-in rechargeable battery in your device by yourself. The battery can only be changed by ZTE or ZTE authorized service provider.

Warning and Notice

Limited Warranty

This warranty does not apply to defects or errors in the product caused by:

- i. Reasonable abrasion.
- ii. End users' failure to follow ZTE's installation, operation or maintenance instructions or procedures.
- iii. End users' mishandling, misuse, negligence, or improper installation, disassembly, storage, servicing or operation of the product.
- iv. Modifications or repairs not provided by ZTE or a ZTE-certified individual.
- v. Power failures, surges, fire, flood, accidents, and actions of third parties or other events outside ZTE's reasonable control.
- vi. Usage of third-party products or usage in conjunction with third-party products if such defects are due to the combined usage.
- vii. Any other cause beyond the range of normal usage intended for the product.

Warning and Notice

End users have no right to reject or return the product, or receive a refund for the product from ZTE under the above-mentioned situations.

This warranty is end users' sole remedy and ZTE's sole liability for defective or nonconforming items, and is in lieu of all other warranties, expressed, implied or statutory, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, unless otherwise required under the mandatory provisions of the law.

Limitation of Liability

ZTE shall not be liable for any loss of profits or indirect, special, incidental or consequential damages resulting from or arising out of or in connection with using of this product, no matter whether or not ZTE had been advised, knew or should have known of the possibility of such damages, including, but not limited to lost profits, interruption of business, cost of capital, cost of substitute facilities or product, or any downtime cost.
