

## TELSTRA WI-FI 4G – MF91 Upgrade Instructions

The MF91 upgrade fixes some important security issues and supports new network features.

1. Download the upgrade tool and save to a known location.
2. Make sure your MF91 is switched on and connected to your PC using the USB lead supplied.
3. Run the tool, the tool will detect the port and display the current version:

4. Press 'Start'. The upgrade takes 4-5 minutes
5. Wait for the Upgrade Success message:

6. Complete

### Notes

- Do not insert or remove any USB devices during the upgrade.
- Do not disconnect the MF91 until the upgrade is complete
- Do not allow your computer to hibernate or sleep during the upgrade.
- If you are using a laptop please connect to mains power.
