

nubia Gaming Controller – Quick Guide

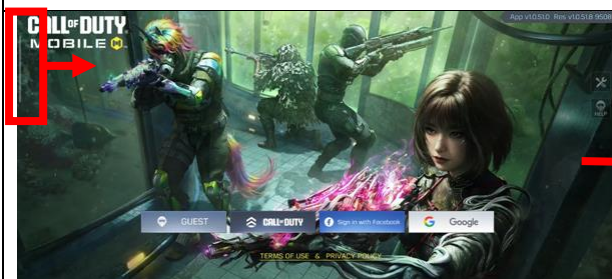

1. Insert your handset carefully into the gaming controller.
2. If your handset has a protective cover you may have to remove the small rubber stops on the left to make sure the handset fits into the controller.
3. When the controller is successfully connected the nubia LED will light up blue and you will see this pop up on your device screen:

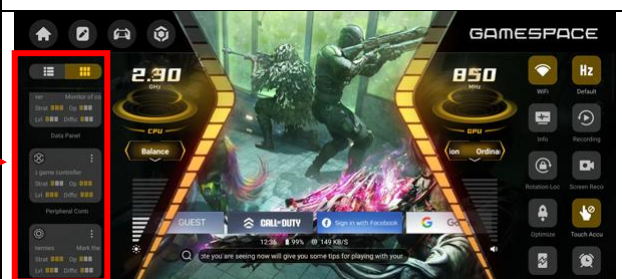

4. The handset can be charged while in the controller using the USB port.
5. Search Play Store for '**Controller Compatible Games**' - some games are pre-configured to work with controllers – Not all games and apps are compatible with external controllers.
6. If the keys and controls are not mapped you can use the Game Space application to map the game keys to the controller.

Swipe the control bar to open the **Game Space** configuration page.

Select **Peripheral Control** from the panel on the left of Game Space.

7. TIP: Launch the **Game Space** application to configure and save your controller settings.
8. Please click on this link to view further instructions and video set up guides:
