**Optus X-Total 2**

**Quick Start Guide**

# Getting to know your phone

Your phone supports 2.4 GHz and 5 GHz Wi-Fi.

# Setting up your phone

The nano-SIM card(s) can be installed or removed while the phone is turned on.

## **WARNING!**

To avoid damage to the phone, do not use any other kind of SIM cards, or any non-standard nano-SIM card cut from a SIM card. You can get a standard nano-SIM card from your service provider.

1. Insert the tip of the tray eject tool into the hole on the card tray.

## **NOTE:**

Please use the tray eject tool included in the box. Otherwise the card tray may not be ejected.

## **CAUTION:**

Never replace the included tray eject tool with sharp objects. Ensure that the tray eject tool is perpendicular to the hole. Otherwise, the phone may be damaged.

2. Pull out the card tray and place the nano-SIM card(s) and the microSDXC card (optional) on the card slots, as shown. Carefully slide the tray back into place.

 **NOTE:**

If two nano-SIM cards are installed, both cards can connect to the 4G network, and either card can be used for mobile data.

# Charging the Phone

Your phone's battery should have enough power for the phone to turn on, find a signal, and make a few calls. You should fully charge the battery as soon as possible.

## **WARNING!**

Use only chargers and USB Type-C cables approved by the phone manufacturer. The use of unapproved accessories could damage your phone or cause the battery to explode.

## **WARNING!**

**Do not remove the back cover. The battery is not removable. Removal may cause fire or explosion.**

1. Connect the adapter to the charging port.

2. Connect the charger to a standard AC power outlet.
3. Disconnect the charger when the battery is fully charged.

## **NOTE:**

If the battery is extremely low, you may be unable to power on the phone even when it is being charged. In this case, try again after charging the phone for at least 20 minutes. Contact the customer service if you still cannot power on the phone after prolonged charging.

# Powering On/Off Your Phone

Make sure the battery is charged before powering on.

- Press and hold the **Power** key to turn on your phone.
- To power off, press and hold the **Power** key until the power off/restart menu appears, and then touch  > .

## **NOTE:**

If the screen freezes or takes too long to respond, try pressing and holding the **Power** key for over 10 seconds to restart the phone.

## Waking up your phone

Your phone automatically goes into sleep mode when it is not in use for some time. The display is turned off to save power and the keys are locked to prevent accidental operations.

You can wake up your phone by turning on the display and unlocking the keys.

1. Press the **Power** key to turn the screen on.
2. Swipe up on the screen.

## **NOTE:**

If you have set a face verification, a fingerprint, an unlock pattern, a PIN or a password for your phone, you'll need to use your face or fingerprint, draw the pattern, or enter the PIN/password to unlock your screen.

# PRODUCT SAFETY INFORMATION

---

Don't make or receive phone calls while driving. Never text while driving.

---

Keep your phone at least 5mm away from your body while making calls.

---

Small parts may cause choking.

---
