ZTE Australia provides dedicated support with a local call centre and social media outreach. Search ‘ZTE Australia’ on Facebook and Twitter to keep in touch.

Find us on Facebook

© ZTE 2019 Ver 1.0  Sept 2019

The worst case SAR value for this device is published on ztemobiles.com.au
GETTING STARTED

INSERT YOUR SIM CARD.
Open the SIM cover on the top right side of the device. There is a finger notch at the bottom of the SIM cover, use a finger nail to gently lift up the SIM cover towards the top of the handset.

1. Locate the pin hole.
   Insert the pin pusher provided into the pin hole to eject the SIM tray.

2. Place the SIM card into the tray as shown and push the tray into the SIM slot until it clicks and locks into place.

3. Close the SIM cover to maintain water protection integrity.
INSTALL A MICRO SD CARD

A microSD card can be installed or removed while the phone is turned on. You need to unmount the microSD card before removing it. The device supports microSD(HC) cards up to 128GB. Insert into the SIM tray as shown above.

Battery Warnings

Do not disassemble the device. The battery is non user replaceable. Do not dispose of the device in a fire, the battery may explode. Only use genuine chargers and accessories.

SWITCH YOUR DEVICE ON OR OFF, CHARGE YOUR BATTERY

- Press and hold the Power Key to turn on your phone.
- To turn it off, press and hold the Power Key to open the options menu.
- Check the correct orientation of the lead, then insert the charger lead.
- Do not force the connector into the charger jack.
- Connect the charger to a standard AC wall outlet.
- Disconnect the charger when the battery is fully charged.
- If the phone is on, you’ll see the charging icon on the status bar.
- If the battery is low, there will be a pop-up message on the screen. As you charge your phone, the lock screen will tell you the battery level each time you wake up your phone.
• On first use please charge the battery for 3-4 hours. It is better to keep your battery topped up than to let it fully discharge.

TIPS TO MAXIMISE BATTERY LIFE
• After 2-3 charge / discharge cycles the battery life will improve. From then on use top up charging to recharge frequently and always charge promptly when flat.
• To avoid the battery entering a deep discharged state charge the battery promptly when flat.
• If the battery is deeply discharged it can take 30 minutes to start charging. Leave it on charge to recover the battery.
• Keep your handset and battery cool. High temperatures degrade the battery more quickly.
• Normal charge time is 3-4 hours. Do not charge more than 24hrs.
• When not using the phone for long periods charge to approx 40% and remove the battery.
• With low network signal conditions battery life is reduced.
• Turn off Bluetooth and Wi-Fi when not in use, and set the screen brightness to automatic to maximise battery life.
GOOGLE ACTIVATION WIZARD: CREATE OR LOG IN TO A GOOGLE ACCOUNT
We recommend you log in or create a Google account to enable access to Google services.

Follow the activation wizard to create or log in to an existing Google account.

TIPS
If you set a lock code on your device and then forget the pattern, PIN or password it can be reset using your Google Account. After 5 incorrect unlock attempts you are prompted to enter your Google password to unlock your device.

Always reset the handset from the Settings menu. If you factory reset a phone from the Android Recovery menu then it will be locked to the Google account stored in the phone.
WAKE UP FROM SLEEP MODE

- Press the Power key to activate the display.
- Slide the screen Up to unlock.
- Slide the icons on the bottom panel for quick access to the Phone or Camera.

SWITCH YOUR HANDSET TO SLEEP MODE

Press the Power key to activate sleep mode.

Sleep Mode activates automatically with the timeout set from Options > System settings > Display > Sleep.

TIP

If you set an unlock pattern, PIN or password you need to enter it to unlock the screen. If you forget your pattern or PIN use your Google Account password to reset the phone. This will only work if you register a Google account with this handset.

ACCESS THE QUICK SETTINGS PANEL

Swipe down from the top of the home screen to access the Quick Settings panel. Touch each icon to switch that feature on or off, long press Wi-Fi or Bluetooth to access more features.

THE QUICK SETTINGS PANEL:

Pull down from the top of the screen twice to access the quick settings panel or pull down once using two fingers.

Use the pen icon to Edit the layout and use the Settings icon as a shortcut to Settings

You can long press on some icons to jumpt to their menu settings.
APPLICATIONS

Flick the screen up from the bottom to view the All Apps list. You can install additional applications by going to Play Store.

INSTALL APPLICATIONS FROM GOOGLE PLAY STORE

Tap Play Store from the Home Screen to download and install applications. Select the item and tap Install.

- You need a Google account to access Play Store
- Follow the wizard to sign in to an existing account or to create a new account.

UNINSTALL APPLICATIONS

- From the Apps tray, press and hold on the app and drag to Uninstall.
- From Settings go to Apps > locate the app then choose Uninstall
- Tap Uninstall, tap OK to confirm.
MULTI-TASKING AND THE TASKS KEY

Run multiple applications simultaneously: Press the Home key from any application to return to the home screen then launch another app. The original application will be suspended until you return to it.

Press the Tasks key to view recent apps, double tap on the tasks key to toggle between the two most recent apps.

TIPS

If you are finished with an application use the Back key to exit the application. If you leave applications running in the background the system memory will be consumed and the device will become slow to respond. Return to the app and close it, or from the Home screen press the tasks key then press ‘Clear All’ to shut down any unnecessary apps and processes.
**SETTINGS**

Swipe down twice from the top of the screen then press the Settings icon. (You can also swipe down once with two fingers)

PHONE CALLS

• Press the Phone icon to launch the Phone application. This will open in the same state it was last used, this can be the Dial Pad view or the Favorites / Recents / Contacts view. Press the Dial pad icon to bring up the dial pad or press Back to move from the Dial Pad to the alternate view.
• In the Dial pad view enter numbers on the key pad then press the Call icon . The phone will match numbers and names in your Contacts list.
• From the Favorites / Recents / Contacts view press for the Dial pad or tap Search contacts, type a name or number, tap the Mic to speak a number or press Options.
• Tap numbers on the dial pad or select from Call Logs or Favourites displayed on screen.
• Tap the call key to make the call.
• Press End to end the call.
FUNCTIONS DURING A CALL:

During a call when you move the handset away from your ear the screen lights up. Use the buttons for the features described:

Add call – place the current call on hold and dial another party.
Hold – Place the caller on Hold
Contacts – view your Contacts lists
Mute – Mute the microphone
Keypad – enter DTMF (touch) tones
Speaker – Use Handsfree, Speaker mode
MAKE A CALL FROM CONTACTS

• Touch the Phone icon to open the Dialler. Contacts are shown on the third tab from the Favorites / Recents / Contacts view. If you are not on this view press the Back button.
• Contacts are displayed in alphabetical order.
• Slide up or down to scroll through your Contacts list.
• Tap to select the Contact then tap to call.

TIPS
Tap ☰ to search for a Contact.
Whenever you see the phone icon you can press that to make a call.

MAKE A CALL FROM CALL LOGS

• Unlock the phone and press the Call Key 📞
• Touch the Recents tab at the bottom to see your Call History
• Scroll and tap the required number to start the call, tap the arrow button to view the call details if required
MAKE A CALL FROM A TEXT MESSAGE

• Unlock the phone and press 📭 for messages. Tap the thread that contains the phone number to call.
• Tap the number then tap 📞 to call
• Press End to end the call.

TURN THE SPEAKER ON/OFF (HANDSFREE)
Tap Speaker during a call. The speakerphone icon is displayed.

MUTE A CALL 🎤
During a call tap Mute to mute your microphone.

MAKE A CONFERENCE CALL
A conference call can be made between yourself and two or more other parties.
• Call the first number.
• While you are connected, tap Add call.
• Call the second number.
• While you are connected to the second number, tap **Merge**
• To add the third party, tap Add call.
• Dial the number, and when connected, tap **Merge**

**MAKE AN INTERNATIONAL CALL**
• Press the Call Key 📞 on the home screen to open the dialer.
• Hold down the 0 key to enter the ‘+’ symbol for International Dialling
• Enter the full phone number.
• Tap 📞 to make the call. Press End to end the call.

**INSERT A PAUSE OR WAIT WHILE DIALLING**
• Enter the phone number on the Dial pad. The Options button 📋 is shown next to the entered numbers,
• Press Options 📋 > Add 2-sec pause to add a Pause
• Press Options 📋 > Add Wait to wait for the next key press.
CALLER ID, CALL FORWARDING (DIVERT), BLOCK NUMBERS
DIALLER > OPTIONS > SETTINGs > CALL SETTINGS
Press the Phone icon. If the dial pad is open press the back button. Press the three dots in the top Search bar for Options > Settings:
Display Options- Sort by name, first name / last name options
Sounds and vibration – Enable Vibrate mode and Keytones
Quick responses – Configure SMS responses for a rejected call
Call Settings – Call Forwarding, Call Waiting and Call barring settings, press Additional settings for Caller ID (Show or hide your number)

ANSWER AN INCOMING CALL
Swipe up to answer the call
Swipe down to reject the call.
Press Answer or Decline
CONTACTS

Add contacts to your phone and synchronise them with your Google account. Existing SIM or Google contacts are shown by default.

You can view your Contacts through the Phone Dialler or choose from the Apps area

• Touch **Apps > 📞** to access your contact list.
• Scroll through the list to view all your contacts.
• Touch a contact to view its details.

**TIP:** If you have a lot of contacts stored, you'll see a slider when you touch the right side of the screen. To go directly to a letter, press and hold the slider and drag it to a letter.

We recommend using a Google account to store your Contacts. They can then be transferred effortlessly between devices and you can access your Google contact list from any internet connected device once you sign in.
Adding a New Contact

- Slide up from the bottom of the screen and press Contacts 📞
- Touch + to add a new contact, or Add new Contact if using the Phone interface.
- Select where to save the new Contact, Google account or Phone.
- Enter the contact name, phone numbers, email addresses, and other information.
- Touch Save at the top when finished.

Import, Export, and Share Contacts

You can import/export contacts from/to your SIM or Storage (microSD card). This is useful when transferring contacts between different devices.

Import your SIM card Contacts to add more features such as dedicated Ringtone, Photos etc.

**Import Contacts From the SIM Card**

- Open Contacts 📞 > Menu ☀️ > Settings > Import
- Select Import from SIM card
• Select individual contacts, or use Options > Select All.

• Press the Import icon at the top

• Select an account to save the contacts

**Import Contacts From the microSD Card**

• Open Contacts 📞 > Menu ☰ > Settings > Import

• Select Import from storage

• Select individual contacts, or use Options > Select All.

• Press the Import icon at the top

• Select an account to save the contacts.

• Supported vcf files (Vcard) will be imported to the chosen destination.

**Export Contacts to the SIM Card**

• Open Contacts 📞 > Menu ☰ > Settings > Export

• Select Export to SIM card.

• Tap to select individual contacts, or use the box in the top right to Select All and then to Export
Export Contacts to the microSD Card

- Open Contacts 📞 > Menu 📔 > Settings > Export
- Select Export to Storage
- Tap to select individual contacts, or use the box in the top right to Select All and then 🔄 to Export

Share Contacts

- Open Contacts 📞
- Locate and touch the Contact
- Touch Options > Share
- Choose to share via Messages, Bluetooth, Gmail, Drive etc
- Share Multiple contacts using Import/export, Share visible contacts.

Add a Contact to Favourites

You can add the contacts used frequently to Favourites, so you can find them quickly.

- Open Contacts 📞
- Touch a contact and then touch ★ to add to favourites.
Remove a Contact From Favourites

- Open Contacts
- Touch a favourite contact and then touch 🌟

Searching for a Contact

- Open Contacts
- Touch 🔍 at the top of the screen.
- Enter the contact name, all matching Contacts will be displayed.

Edit Contact Details

- Open Contacts
- Select the contact and touch the pen icon ✍️ to edit.
- Edit the contact and touch SAVE when finished

Set a dedicated Ringtone for a Contact

- Open Contacts
- Select the contact and touch the pen icon ✍️ to edit.
- Scroll down and press More fields
• Touch Default ringtone Select a ringtone and touch OK

**Add a picture to a Contact**
• Open Contacts

• Select the contact the touch the pen icon to edit
• Touch the Camera icon in the top picture area.
• Select Take photo to take a new shot or Choose photo to pick an existing photo.
• Press Save when done.

**Delete a Contact**
• Open Contacts

• Touch a contact to delete and touch Options > Delete.
• Touch OK to confirm.

**To delete several contacts:**
• Open Contacts

• Touch and hold to select a contact, touch more if required
• Touch then OK to confirm.
MESSAGES

SMS AND MMS MESSAGES

From the Home screen tap the messages icon to access SMS and MMS messages. Unread messages will show a notification at the top of the screen. Open new messages from the Notifications Panel or the Messaging Screen. Tap the message to read it.

SMS and MMS messages sent and received are grouped into message threads in the Messaging screen. Message threads show you the history of messages from the specific contact. Threads are sorted by received time, with the latest one at the bottom.

SEND AN SMS MESSAGE

- If the Messages app opens into an existing thread press the Back key to return to the main menu.
- Press Start chat to write a new message.
- Enter the recipient’s name or number in the ‘To’ field.
• Tap in the Type message field enter your message.
• Tap the arrow to Send.

SEND AN MMS MESSAGE (MULTI MEDIA)
• If the Messages app opens into an existing thread press the Back key to return to the main menu.
• Press **Start chat** to write a new message.
• Enter the recipient’s name or number in the ‘To’ field
• Tap in the Type message field enter your message.
• Touch the + icon to add your Location, send a voice message, attach a file etc
• Touch the Camera icon to add a picture or take a new picture to add.
• Tap the arrow to Send.

SAVE ATTACHMENTS (EG PICTURES) FROM AN INCOMING MESSAGE
• Open Messages and open the message with the attachment

• Touch the attachment then press the Save icon to save a local copy of the attachment.
USING GROUP MESSAGES
• When you add multiple Contacts to an SMS it is converted into a Group MMS. All recipients can reply individually, or reply to all.

FORWARDING A MESSAGE
Long press an individual message to highlight it, then press three dots for Options > Share, Forward, View details.

REPLY TO A MESSAGE
• Tap the message (or thread) you want to reply to from the Messaging Screen.
• Tap Type to compose and enter the contents of your message.
• Tap the arrow to Send when done.

ACCESS DRAFT MESSAGES
Draft messages are automatically saved when you exit the message application without having sent the message. If you have any messages in Draft status they are marked in red with Draft
DELETE A MESSAGE (THREAD)

- From the Message app overview press and hold on the thread then choose the delete icon.
- Tap OK.
- To delete an individual message (not a thread) tap and hold the message then press Delete.

MESSAGE SETTINGS

Tap Messages > three dots for Options > Settings to configure message settings such as Storage settings, SMS Settings, MMS Settings, Notifications settings and Signature settings.

MULTIPLE SMS MESSAGE CHARGING:

A standard SMS message can contain up to 160 characters. If you exceed this length the message will be sent as more than 1 SMS. You will be charged for multiple SMS messages depending on the length.
USING EMAIL

Create an Email account to receive Emails on your phone.

- Tap Apps > Gmail to set up your email account
- Enter your Email address and Password
- Follow the prompts. You may need to refer to your email service provider to complete the settings.
- Set your required options choosing from the Account options screen.

You can also use web based email accounts or download specific email clients for your email provider.

COMPOSE AN EMAIL

- Tap Apps > Email (First time you need to set up your account)
- Tap the plus icon (+) to write a new message.
- Enter the recipient’s email address in the ‘To’ field and a Subject if required. Tap Cc to add more recipients if required.
- When you enter the address, the matching addresses saved in your Contacts will be displayed. You can tap the recipient from the list.
• Enter the subject and the content of your Email.
• Tap the arrow to Send.

REPLY, REPLY TO ALL, FORWARD AN EMAIL
• Tap Apps > Email to see your Inbox.
• Select the email
• Scroll to the bottom to Reply, Reply all or Forward the email.
• Enter the contents / recipients of your Email. Tap the arrow to send.

EMAIL SETTINGS
Tap Apps > Email then touch the three bars at the top for Options > Settings.
CONNECT TO A COMPUTER

Transfer audio, video and picture files between your handset and your computer.

**PC**

Connect your handset using the USB data lead supplied. Pull down the notifications window, touch Android System USB to check the USB connection settings:

Select **File Transfer** then open Explorer on the PC and browse the handset.

Select **Install driver** to install USB tethering drivers if required. Use Windows Explorer to open the CD Drive: USB_Driver, then double click the setup application.

**MAC**

On your MAC, download and **install Android File Transfer**.

Connect your handset using the USB data lead supplied. Select **Transfer files** from the notifications window, The handset will show up as an external drive on your MAC desktop.
CONNECT TO THE INTERNET

You can access the internet through the mobile network or via Wi-Fi. When logged on to a Wi-Fi connection all data will be sent via THE Wi-Fi network.

To disable mobile network data slide down the Quick Settings Panel from the top of the handset screen then tap the network signal bar icon to switch Data on or off.

**WI-FI**

Wi-Fi provides wireless Internet access over distances of up to 50 meters using compatible home or commercial Wi-Fi hotspots.

- Slide down the Quick Settings Panel from the top of the handset screen then tap the Wi-Fi icon to switch on or off. Long press on the Wi-Fi icon to go to Wi-Fi Settings.
- Alternatively go to Settings > Network & Internet > Wi-Fi
CONNECT TO A WI-FI NETWORK
• Go to Settings > Network & Internet > Wi-Fi
• The available Wi-Fi network names and security settings (open or secured) are displayed.
• Tap a network to connect.
• An open network will automatically connect,
• If you select a secured network you need to enter a password.

CHECK THE WI-FI NETWORK STATUS
• Check the wi-fi icon in the status bar.
• Go to Settings > Network & Internet > Wi-Fi
• Tap the current wireless network to view the network status.
• From Wi-Fi tap Options > Advanced to access further options such as Network notification to switch off the Wi-Fi notification and Keep wi-fi on during sleep, and other options.
SET UP A WI-FI HOTSPOT
A Wi-Fi hotspot shares your network internet connection with other devices nearby. For example, if you are travelling you can connect your laptop wirelessly to your handset to use the internet.
Options > System settings > more > Tethering & portable hotspot > Set up Wi-Fi hotspot.

Scroll down the active window and check Show password to see the password. Tap the fields to change the Network name or password.

USING USB MODEM TETHERING
Use USB tethering to connect a computer to the internet using your device network connection.
Plug your handset to a computer using the USB lead supplied.
Options > System settings> more > Tethering & portable hotspot > USB tethering. First time select Install drivers then subsequently select Connect to PC software to enable tethering.
USING THE BROWSER

Use the Google Search bar on the Home Screen or the Chrome app.

- Tap the Google Search box on the Home Screen.
- Enter your search request using the keypad.
- Press the arrow when done.
- Tap the microphone icon to use speech recognition. Speak your request clearly into the handset microphone.

The first time you open Chrome you are guided through how to use by on screen instructions and demos. Enter any search directly in the top bar. Press Options for new Tabs, Incognito browsing, Bookmarks and other Settings options.
BLUETOOTH

Bluetooth enabled devices can exchange information within a distance of about 10 meters without any physical connection. The Bluetooth devices must be paired to share information.

TURNING BLUETOOTH ON OR OFF

• Switch Bluetooth on or off from the quick settings panel or
• Settings > Connected devices > Bluetooth
• Tap Pair new device to turn on Bluetooth and search for other devices

MAKE YOUR DEVICE VISIBLE TO OTHER DEVICES

• Settings > Connected devices > Bluetooth.
• Your device is visible to other devices while Bluetooth settings is open.

CHANGE YOUR DEVICE NAME

• Settings > Connected devices > Bluetooth.
• Tap Device name to Rename this device
• Enter the name and tap OK.
PAIR WITH ANOTHER BLUETOOTH DEVICE

• Both devices must have Bluetooth turned on.
• Settings > Connected devices > Bluetooth.
• Tap the device to pair with and enter your PIN if required. The same PIN should be used on both devices.
APPS > CAMERA, OR USE THE SHORTCUT ON THE HOMESCREEN

Line up your shot and tap the shutter icon to take the picture.
• Tap the thumbnail in the bottom corner to review the picture.
• Tap the Settings button for camera settings

APPS > CAMERA > VIDEO RECORDER
• Tap the Video icon to start shooting.
• Tap pause or stop
• Tap the icon in the right corner to view the last video clip.
• Tap Settings > Settings to check the video settings.

FM RADIO

To use the FM radio you must insert the headphones as the antenna.

OPEN THE FM RADIO
• Insert the headphones
• Tap Home > Apps > FM Radio
• Press the Star sign to add to favourites
• Press Options to view your all channels list where you can long press on the channel to rename or delete it.

• MUSIC
  You need to have audio files stored on your phone or memory card. Use downloads, Bluetooth or PC Connectivity to copy files to your phone or memory card.
  • Tap Home > Apps > Music
  • Select from Songs, Playlists, Folders, Albums, Artists or Genre
  • To play continuous tracks, select Songs > Options > Play All
  • To play an album select Album then click the first track

SETTING A SONG AS RINGTONE
  • Open the folder where the song you want to set as ringtone is.
  • Hold on the song until a shortcut menu pops up.
  • Select Use as ringtone.

TIP You can also set a song as a ringtone when you are playing it by tapping Options > Use as ringtone.
VOICE RECORDER

Use Voice Recorder to record voice memos that you can also set as a ringtone.

Tap Home > Apps > Voice Recorder.

GOOGLE APPLICATIONS

SIGN IN OR CREATE YOUR GOOGLE ACCOUNT

Sign in to your Google Account to synchronise Gmail, Calendar, and Contacts between your phone and the web.

• Tap a Google application, such as Gmail or Play Store.
• Most apps on the handset are default Google apps. For any specific app guidance search Google for how to use that particular app.
SECURITY

SET A SCREEN UNLOCK PATTERN, PIN, OR PASSWORD
Protect your phone from unauthorised use by creating a personal pattern, PIN or password. Use a pattern, PIN or password you can easily remember.

- Tap Home > Options > System settings > Security > Screen lock
- Choose from Swipe, Pattern, PIN or Password.
- Example for Pattern:
  - Draw a pattern of your choice, tap Continue
  - Draw the pattern again and tap Confirm.
- We recommend you register a Google account before setting your unlock pattern, PIN or Password. After five incorrect entries press Forgot Pattern to enter your Google account password to reset the screen lock.
UNLOCK THE SCREEN WITH A PATTERN
• Press Power Key.
• Draw your pattern to unlock the screen. If you make a mistake you can try again up to five times.
If you forget the unlock pattern then after five attempts you can enter your Google account details to unlock your device.

SET A SIM CARD PIN LOCK
• Set a PIN code on your SIM card to prevent others from using your account.
• The initial PIN code is provided by your service operator.
• Tap Options > System settings > Security > Set up SIM card lock.
• Select Lock SIM card. Enter the PIN and tap OK.

CHANGE SIM PIN
Before changing the SIM PIN, you need to enable it.
UPDATING YOUR DEVICE

Your phone can download and install Software updates.

Settings > System > System update

The software update service checks an online server to see if any updates are available for your phone. If an update is available you can choose to download and install the update.

Downloading via Wi-Fi is highly recommended. Data usage charges will apply if downloading via mobile networks. International roaming data charges will apply for customers downloading the upgrade on a mobile network whilst travelling outside of Australia.

A firmware update will require a restart of your device.
EXTERNAL ANTENNA PORT
Your phone provides an external RF antenna port for connecting to suitable patch leads and antennas. Only use approved ZTE patch leads as other generic leads can damage your device. The RF port can be damaged by rough use, excessive force, bending or twisting on the connector so always take care to insert and remove the connector correctly and gently. The phone’s internal antenna connects to the external RF port. Damage to the RF port can result in the internal antenna being disconnected which will render your device unusable. Physical damage to the external RF port is not covered under warranty.

HEADPHONE AND USB CHARGING PORT
The headphone and the USB charging port are both internally waterproof. If the device is dropped in water it is possible for water to remain in the socket which may affect your device. In the event of device submersion, blow or tap any liquid out of the ports and leave in a warm place to dry for a few hours.

WARRANTY INFORMATION

The warranty does not apply to defects or errors caused by:
(a) Normal wear and tear, mishandling, physical damage, improper installation.
(b) Water, exposure to solvents or any other liquid damage while the port covers are open.
(c) Any unauthorised disassembly, repair or modification.
(d) Power surges, lightning, fire, flood or other natural events.
(e) Use of the product with unauthorised third party products such as generic chargers.
(f) Any other cause beyond the range of normal usage for products.
(g) Physical damage to the antenna port, SIM slot or screen caused by improper use.

The End User shall have no right to reject, return, or receive a refund for any product under the above-mentioned situations. The End User’s statutory rights are not excluded by these terms and conditions.

Note: Consult the warranty card for full information.
SAFETY

GENERAL STATEMENT ON RF ENERGY

The phone is a low-power radio transmitter and receiver. When switched on it intermittently transmits radio frequency (RF) energy (radio waves). The transmit power level is optimised for best performance and automatically reduces when there is good quality reception. Maximum power is only used at the edge of network coverage so under most circumstances the power output is very low. Under poor network conditions the phone transmits at a higher power, may get hot and have a shorter battery life.

SPECIFIC ABSORPTION RATE (SAR)

The phone is designed not to exceed the limits for exposure to radio waves recommended by the ICNIRP. The limits include safety margins designed to assure the protection of all persons, regardless of age and health. The guidelines measure the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2W/Kg. This device has been tested and approved to be lower than the maximum allowed SAR value. The worst case SAR value for this device is published on ztemobiles.com.au
